BAY LOUNGE

pinus sylvestris

3 YEAR
WARRANTY

Our new **Bay Lounge** collection is a stunning addition to our Pine furniture. As with all our pine the wood is carefully sourced from responsibly managed forests in Eastern Europe. Each piece has been treated with a grey preservative, making it suitable for outdoor use.

Our **Bay Lounge** range is a modular set and can be configured in multiple different shapes to suit your garden. There is a choice of two size planters to place around the **Bay Lounge**. The square planter can be used as a side table/arm rest by using the lid supplied, which then doubles up as storage.

Once placed in position, we recommend an annual treatment using a grey preservative to maintain the distinctive look of this collection. All of our **Pine** is FSC® 100% certified.

HARDWOOD PARASOLS

HARDWOOD PARASOLS

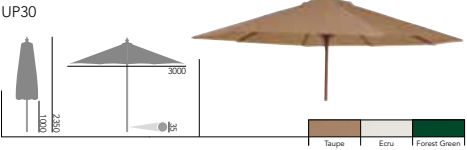

Alexander Rose hardwood parasols are operated using a pulley and locking pin system. Simply pull the rope down to raise your parasol up to the desired height and place the brass pin in one of the pole holes to secure. To lower the parasol remove the locking pin and slowly let the rope pass through your hands until the canopy is folded. We recommend that the parasol is not left up in windy conditions. It is essential to use an Alexander Rose base to add stability. Comes with night covers.

CANTILEVER PARASOLS

CANTILEVERS

Our elegant cantilever parasols can be positioned to provide maximum shade. They appear to float above the furniture and can be manually rotated to follow the sun. They are free standing, which allows you to position the furniture underneath rather than around a central pole as with conventional designs. The crank mechanism enables effortless use.

The parasols are made using lightweight durable polyester fabric which is water resistant and easy to clean. To clean your parasol we advise that the fabric is kept attached to the frame. For best results use a soft brush or broom and warm soapy water. For more stubborn stains the canopy can be removed and washed at 30°C. Once washed it is important to put the canopy back on the frame to dry.

UHP

The UHP parasol is easy to operate with the simple handle and lock mechanism. To rotate the parasol simply unlock the handle and move into the desired position, and then lock the handle to secure. The UHP can be easily bolted to an Alexander Rose UHGB50 granite base. To be used with a FC17 cover.

UH30

The UH30 is an 18 spoke curved 3.0m cantilever parasol. As with the UHP it is easy to raise and lower the canopy with a crank handle mechanism. The canopy can be adjusted into 7 positions to give maximum shade from the sun. The parasol also has a foot operated pedal for 360° rotation. For use with the UHGB90 granite base. Comes with a night cover.

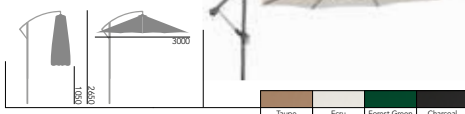

UH35/UH35LARGE

The UH35 parasol has a unique design, tilting to 180° to cover the slightest of angles and protect everyone from the sun. The main feature is the ability to spin 360° on its axis. Easy to operate with the simple crank handle, you will be shaded from the sun in seconds. It can be easily bolted to an Alexander Rose UHGB90 granite base. Comes with a night cover.

BASES

GRANITE BASES

For freestanding parasols we recommend using either a GB20 (20kg) or GB30 (30kg), however if you are using parasols through the centre of a table you can use the GB11 (11kg) for a 4 seater set and GB20 (20kg) or GB30 (30kg) for 6 seater sets or more.

COMPOSITE BASE

The composite base is for use with parasols being used through the centre of a table.

It has 2 locking handles on the stem of the base to secure the parasol in place, minimising movement.

CANTILEVER BASE (50kg)

The UHGB50 base is designed to be used with the UHP range of cantilever parasols.

It has convenient small wheels, allowing the base to be moved along a flat surface easily.

CANTILEVER BASE (90kg)

The UHGB90 base has been designed to be used with the UH35 and UH30.

The UHGB90 has locking wheels to secure the parasol and prevent any movement.

CANTILEVER BASE (2 x 90kg)

The UH35LARGE has been designed to be used with 2 UHGB90 bases, one on top of the other. They need to be bolted together with the bolts provided.

The UHGB90 has locking wheels to secure the parasol and prevent any movement.

TENT EFFECT

Depending on the type of Alexander Rose furniture you have, it may be necessary to place an object such as a bucket between the furniture and the cover. This will reduce the amount of sagging and will help the airflow around the furniture, this will prevent the chance of rotting occurring.

INSCRIPTIONS & FURNITURE ANCHORS

BENCH ENGRAVINGS

Alexander Rose offers an engraving service with three options: brass plaque, stainless steel plaque and direct engravings onto our furniture. Our brass plaque offers a more traditional look for your inscription. Stainless steel plaques provide a more contemporary look with a silver shine, and they will not rust.

If you are looking for something unique we offer a direct engraving service. Your inscription is carved directly into the timber by a computer-aided engraving machine. A direct engraving will mellow down along with the bench to a silver/grey finish if left untreated. You will find treatment recommendations on page 98.

FURNITURE ANCHORS

We have designed two types of anchors for different surfaces, the most common being lawns. Using an Alexander Rose soft ground anchor kit avoids the need for concrete. Installation is quick and easy without any mess.

Our soft ground anchors come with solid brass plates that screw onto the outside legs. These have sleeves to allow the anchors to pass through and penetrate the surface. When an anchor approaches its maximum depth (500mm) a curved fluke is released to grip the bench further into the surface, adding more security.

Our bolt down anchors are designed to be used with concrete. They have a maximum depth of 110mm and require a 20mm masonry drill bit to install them.

TIMBER TREATMENTS

TIMBER CARE

Alexander Rose manufactures garden furniture which will last for many years. Over time, as part of the natural weathering process, cracks and splits will appear in the wood, particularly on the end grain and to a lesser extent on the surface. The drier the wood, the more cracks will appear due to the evaporation of natural oils and minerals in the wood from exposure to the elements. As with most hardwoods, this is a normal characteristic for any timber which remains outdoors. Our timber furniture is designed with this in mind and its strength and durability will remain unaffected. Wooden furniture can be treated with our specially formulated care products to give a beautiful rich finish and enhance the look of the wood. Alternatively it can be left to turn a mellow silver/grey, and should be cleaned occasionally with soapy water.

TIMBER MAINTENANCE

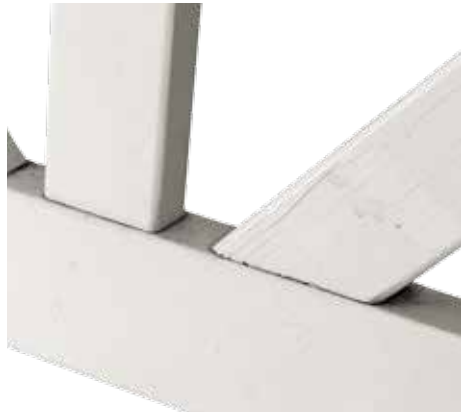

TIMBER MAINTENANCE

Weathering occurs over a period of time, and you can expect to see changes in the timber after a few weeks. Timber is a natural material, it absorbs moisture in wet conditions and is likely to expand. In dry conditions the timber dries and may shrink a small amount. As the material moves, surface cracks will appear in the timber. You can maintain the appearance of your furniture by lightly sanding down the timber and applying one of our specially formulated care products.

PAINTED ACACIA MAINTENANCE

The white Painted Acacia furniture is produced by applying a polyurethane paint to the Acacia timber. After time there may be hairline cracks in the finish, due to the timber moving. Expansion and contraction of timber is normal and is caused by climatic variation, this is more noticeable around the joints.

New England benches are designed to be used outside, we recommend regular maintenance to retain their original condition. This can be done by sanding the affected area down to the natural timber, a reddish colour, then evenly re-applying a white satin polyurethane paint to the area. Polyurethane paint can be purchased from any DIY or Hardware store. If you are unsure about what paint to use please contact Alexander Rose.
