SUAVE

by Marcel Wanders

Marcel Wanders

Boxtel, Netherlands. 1963

Born in Boxtel, Wanders graduated cum laude from the Hogeschool voor de Kunsten Institute of the Arts Arnhem in 1988 after being expelled from the Design Academy Eindhoven.

In 2000 he opened his studio in Amsterdam, gaining attention in 1996 with his Knotted Chair, which paired high tech materials with 'low tech' production methods and in 2001 Wanders co-founded the design label Moooi., of which he is co-owner and art director.

Marcel Wanders' chief concern is bringing the human touch back to design, ushering in what he calls design's 'new age,' in which designer, craftsman and user are reunited. In his process, Marcel Wanders defies design dogma, preferring instead to focus on holistic solutions rather than the technocratic. In this universe, the coldness of industrialism is replaced instead by the poetry, fantasy and romance of different ages, vividly brought to life in the contemporary moment.

He founded Ramon Esteve Estudio de Arquitectura in 1991, working on both architectural and interior design projects and also other fields such as industrial design and art direction worldwide. The VELA Collection offers a wide range of outdoor furniture and planter collections that is available for indoor and outdoor use. VELA is based in prismatic geometry, that features the right balance between its proportions. The elements can combine among themselves to integrate into any space. An illusion of floating is created, the incorporated lights transform them into floating architectures.

Eugeni Quitllet

Ibiza, Spain 1972

The Catalan designer Eugeni Quitllet was born on 17th April 1972 in Ibiza. He graduated from 'La Llotja' art school in Barcelona. Through his creative vocabulary he exceeds simple relationships between function and style unveiling innovative objects. Between drawing, sculpture and contemporary archaeology, Quitllet literally reveals silhouettes hidden in the material, extremely visual skeletal objects elegantly master fullness and emptiness often with a touch of humour: the Masters chair combines the 3 contours of legendary seats by Eames, Saarinen and Jacobsen, the K Ray lamp is an organic UFO, a network of veins hollowed out of the material which results in an object suspended in a frame, his signature method prevalent naturally in several of the designer's projects: the Shine vases, the Light Air lamp, the o'Clock lamp, without forgetting the O Ring watch, a hole in time in the true sense, best seller of the brand Fossil modernising watchmaking codes. Eugeni Quitllet is a design world freak capable of devouring the whole of our environment in his own way to serve it up to us transformed.

Ross Lovegrove

Wales, UK 1958

Inspired by the logic and beauty of nature his design possess a trinity between technology, materials science and intelligent organic form, creating what many industrial leaders see as the new aesthetic expression for the 21st Century. There is always embedded a deeply human and resourceful approach in his designs, which project an optimism, and innovative vitality in everything he touches from cameras to cars to trains, aviation and architecture.

Ora-ïto

Marseille, France. 1977

Born in 1977, this iconoclastic artist became globally famous at the end of the 90's by hijacking in 3D the products of the most emblematic and international brands such as Vuitton, Apple, Nike and Bic ... Furthermore thanks to numerous publications in the press, the fiction turned into reality. When customers tried to purchase these imaginary products, the orders flooded Ora-ïto's web site. This became the second digital work ever acquired by the National Funds of Contemporary Art (FNAC). During the years 2000, Ora-ïto dedicated himself to his own studio and the creation of real products, by developing transversal projects of nearly all the business sectors of design, architecture, communication, and so on.

His creations conceal the codes of a new luxury, timeless and universal with the same minimal working drawing: evident forms to be understood in flash, fruit of his philosophy.

Palomba's Team

Italy 1994

Ludovica+Roberto Palomba's work has always been rich of cultural references. Their projects are derived from observations of change in human behavior. Their mission is to generate products that merge function, innovation and longevity – intimate and emotional connections that last. "We believe that good design already exist in a sort of collective unconsciousness and our task is to mold and deliver them". A truly successful piece of design must feel fresh but not unfamiliar when it is discovered.

BONES

by Ludovica + Roberto Palomba

Bones is elegant in its slender shape but at the same time strong in its build. Its generous volume is softened by a subtle edge that makes it light. Bones on an engineering level is fantastic, with an invisible internal structure that provides the necessary strength, transmitting the weight from the base of the container to the base of the flowerpot to bear the weight of any plant or tree. Bones is made of resin of PE by means of the rotational molding technique and is available with various VONDOM finishes.

Bones es elegante por su esbeltez pero a la vez robusta por su concepción. Su generoso volumen es aliviado por un sutil reborde que la hace ligera. Bones a nivel de ingeniería Bones es genial, una estructura interna invisible a la vista proporciona la robustez necesaria transmitiendo el peso desde la base del contenedor a la base de la maceta para lograr soportar el peso de cualquier planta o árbol. Bones está fabricado en resina de PE mediante la técnica del moldeo rotacional y se ofrece en los acabados made in VONDOM.

PEACOCK

by Eero Aarnio

Eero Aarnio

Helsinki, 1932

Aarnio studied at the Institute of Industrial Arts in Helsinki, and started his own office in 1962. The following year, he introduced his Ball Chair, a hollow sphere on a stand, open on one side to allow a person to sit within. The similar Bubble Chair was clear and suspended from above. Other innovative designs included his floating Pastil Chair (similar to a solid inner tube),[2] and Tomato Chair (more stable with a seat between three spheres). His Screw Table, as the name suggests, had the appearance of a flat head screw driven into the ground. He was awarded the American Industrial Design award in 1968.

Aarnio's designs were an important aspect of 1960s popular culture, and could often be seen as part of sets in period science-fiction films.[3] Because his designs used very simple geometric forms, they were ideal for such productions. Eero Aarnio continues to create new designs, including toys and furniture for children. Eero Aarnio opened his official webshop and first Design Eero Aarnio Showroom, in Helsinki. There you can find Aarnio's latest design, prototypes and latest news.

Teresa Sapey

Italy 1962

Studio Teresa Sapey is an architecture and design studio based in Madrid since it was founded in 1990. The team's guiding force streams from curiosity and energy. In fact, the range of fields approached by this practice is extremely broad: It varies from spaces to displays via furniture, graphics and editorial works. Projects not only stem from feelings, but they are also capable of transmitting these same emotions to their clients and customers. "By working with spaces my aim is to be touching and therefore render emotions palpable: Three-dimensional, even four-dimensional. No matter the feelings is, as far as it is a feeling, I would go for it! I believe that architecture should interpret, build and transmit these inspiringly and usefully"

Javier Mariscal

Valencia, 1950

Javier Mariscal is, first and foremost, an image creator who develops his work using all kinds of supports and disciplines. Furniture design, painting, sculpture, illustrations, interior design, graphic design, landscaping, gardening and so on are all the object of his professional, vital activity. He has collaborated with companies such as Memphis, Akaba, Bidasoa, BD Ediciones de Diseño, Moroso, Nani Marquina, Vorwerk, Equipaje, Alessi, Sangetsu, Magis, Cosmic, Amat3, Santa&Cole, Lali que and Phaidon. Mariscal expresses himself using a personal language that is complex in its intention and simple in its statements, innocent yet provocative, that he uses to innovate, risk and communicate. He enjoys provoking the eyes that look at his works and creating complicity with them.

MOMA

by Javier Mariscal

By asking the question “how do we sit down?” three different versions arose that could be adapted into three different environments: one for a chill-out scene, Low, completed with a very comfortable pouf out of the same collection; another to be used when seated in a chair or armchair, Medium; and another for a standing position or when sitting on a stool, High, ideal for the pleasure of enjoying a cup of wine outdoors. The first sketches showed natural shapes, which as the project developed leaned towards more architectural shapes that call to mind a column with a capital or a corbel.

A partir de la pregunta ¿cómo nos sentamos? surgieron tres versiones que podían adaptarse a tres ambientes distintos: una para chill-out, Low, completado con un puf de gran confort de la misma colección; otra para utilizarla sentados en una silla o butaca, Medium, y otra a la que se llega de pie o sentado en un taburete, High, pensando en el placer de tomarse una copa al aire libre. Los primeros bocetos presentaban formas orgánicas que en el desarrollo del proyecto fueron derivando hacia formas más arquitectónicas que recuerdan a una columna con capitel o a una ménsula.

Harry & Camila

Since 2002

Known for their mysterious objects, exemplars of vibrant design of the 21st century. The futuristic shapes are reminiscent of technologies applied to high speed, the imaginary of HARRY & CAMILA drawing on aeronautical performances, with fantasies of aircraft wings, space travel. Their resulting design approach concentrates on experimentation with materials and typologies. HARRY is from the Netherlands, class 1966, industrial designer with a degree from the Design Academy. In 2002 HARRY & CAMILA moved to Barcelona but continue to spend time in their adopted home working with a number of design manufactures. A good mix between the Dutch free spirit and Latin They work across a wide range of disciplines signing for clients worldwide.

Agatha Ruiz de la Prada

Spain 1960

Agatha Ruiz de la Prada first stepped into the fashion world in 1981. The collection proved to be such a success that she soon opened her first studio-shop in the Spanish capital and started to participate in fashion shows in Madrid and Barcelona. Although Agatha gained a certain level of recognition early on in her career, her true fashion breakthrough came when she allied forces with one of Spain's most important department stores, El Corte Inglés. Thanks to this partnership, the designer's collections were soon distributed throughout the entire national territory. Having conquered Spain, Agatha little by little started to cross borders and gain international recognition by means of her fashion shows and exhibitions and then expanded the family of products: clothes, furniture, perfumes...
